

RoSPA

Advanced Road Safety Engineering

Course Overview

This two-day course is designed for qualified Road Safety Auditors who wish to gain their annual two days CPD required throughout the UK in order to continue to undertake road safety audits on the trunk road and motorway networks. The course is also suitable for any road safety professionals who wish to enhance their knowledge of road safety engineering issues.

Ideally candidates will either have attended the RoSPA Road Safety Engineering Course (10 day or Modular) or will have worked in this field for at least two years.

Aims and Objectives

The aim of the course is to provide a learning environment in which delegates and tutors can share information in an open and relaxed manner. It is also to improve delegates' knowledge and skills in relation to recent road safety engineering issues and to encourage participation in a range of challenging workshops, where delegates are stretched in the application of their road safety engineering and road safety audit skills.

Topics Covered

This two-day course focuses on the following key areas:

- Workshop comparing Design Standards and Collision Records to define "safety problems"
- Collision investigation of a key research issue - workshop looking at data to determine whether safety auditors are "getting it right"
- Safety issues for people with sight impairment including site visit to shared space with a registered blind person
- Current issues with DMRB GG 119 (formerly HD 19/15), including a review of analysis of how Safety Audit reports are being written
- Safety Audit visit and report writing workshop
- Certificate of competency discussion
- Cycle safety issues and workshop
